## VENTURES

Moving compelled capital into early-stage climate tech

To learn more and access the WovenEarth Fund I (WEFI) data room: [info@wovenearth.ventures](mailto:info@wovenearth.ventures)

As of June 30th, 2023, WEFI has reached its primary goal of commitments of over \$100M and is now moving towards the \$150M hard cap. Our next closing is scheduled for September 29, 2023.

**Not for Retail Distribution**

### FOCUS

Seek attractive, risk adjusted returns through highly diversified exposure to US early-stage climate tech venture via a carefully crafted fund of funds with unique access.

### OPPORTUNITY

Radical reinvention is required to decarbonize everything to mitigate irreversible effects of climate change. **We believe this global challenge creates an epic investment opportunity buoyed by powerful market forces.** We believe early-stage climate tech is difficult to access and diligence as an investment category and therefore a less crowded sector.

### RETURNS

Attractive returns are our primary goal –mitigating the risk of investing in any single climate tech venture fund by carefully selecting each underlying fund to weave together a highly diversified portfolio.

### UNIQUE ACCESS

Of the over \$100M raised to date, ~\$80M has been committed to 12 managers in 23 funds with exposure to >200 companies. Most of these funds are ≤\$100 mil and closed. We have unique access to managers and to co-investments with them.

### DIVERSIFIED EXPOSURE

A woven fund that increases accessibility to early-stage climate tech. Fully invested at \$150M, WEFI will provide exposure to ~14 managers, >25 funds and >300 portfolio companies, as well as ~25 co-investments, many of which are unique opportunities.

### INVESTOR EDUCATION

We host live and record subject matter workshops, featuring underlying fund managers and their portfolio companies and deliver an LP newsletter with suggested readings, videos and learning tools to better understand early-stage climate investing. LPs will be socialized with underlying Funds/GPs and have an opportunity to build direct long-term relationships.

### IMPACT AND REPORTING

Amplifying impact by accelerating capital investment to incubate and grow innovative companies tackling climate issues. We expect to provide our investors with aggregated impact reporting based on information gathered from our underlying managers.
